

MASTER INVESTOR / LEGAL REVIEW INDEX AND DOCUMENT CONTROL

PPT-EZ-CA-0001 — 23-document M5Canon-conformant review package

v0.6 • September 19, 2026 • INDEX

Human-controlled clean draft • counsel / institutional review as applicable

Package Status

This v0.6 package carries forward the 22-document review set, updates the photo-based Investor Executive Brief through v0.6, and adds DOC-23 for source-of-funds, entity provenance, jurisdiction-chain, and public transaction-graph controls. It remains a working diligence, public-review, technical-review, and counsel-review package, not a representation that the federal conveyance, public grantee, final entity structure, tax credits, financing, permits or project approvals are complete. v0.6 further adds open-reference entity grounding through OpenData.org, spatial/place grounding through Overture/GERS, identifier crosswalk requirements, and a formal evidence gate for SOURCE_CHAIN_ACTIVATED.

Clean-Document Control

- No embedded body/header/footer images or generative media.
- No comments or tracked changes.
- No Word content-control tags or hidden custom XML.
- Core author / last-modified metadata scrubbed; package thumbnails removed.
- No hidden prompts or model tags intentionally retained.
- Visible references to AI, Jev, LLMs or models remain only where substantively required by the transaction architecture.
- Provenance label is “Human-controlled clean draft.” This does not make a false claim about tools used in drafting; substantive approval remains with the project team and counsel.

M5Canon Source-of-Truth Rule

This document is governed by the M5Canon authority hierarchy for PPT-EZ-CA-0001. An authoritative legal act, executed instrument, government record or legally authorized person or institution establishes the legal right or status. A Ricardian contract expresses the authorized right in human-readable and machine-readable form. Deterministic code may validate, constrain, route and enforce only authority already granted. Jev, language models and other probabilistic systems may classify, score, explain and route, but they do not create legal authority. TitleChain records provenance, state, restrictions, authority and receipts. If digital state conflicts with authoritative legal evidence, execution must halt and route to reconciliation and authorized human review.

Critical v0.2 Corrections / Controls

- Fee title remains with the United States until lawful conveyance, then with a qualifying governmental grantee under the contemplated Historic Surplus route; a private/nonprofit operator may participate through approved long-term arrangements.
- Form LP-1 is not treated as a California UNA registration. California Secretary of State guidance identifies Form UA-100 for statements by unincorporated associations; counsel must select the actual entity form/filing.

TitleChain / M5Canon | U.S. Patent Nos. 11,720,888 & 12,518,273 | Public Commons: TitleChain Foundation / ICSN | github.com/TitleChain-Foundation | titlechainfoundation.org

- UCC-1 is used only to perfect/security-priority interests in an actual secured transaction, not as a generic land-title or digital-twin registry.
- CER control is separated from fee title and from the underlying lease/property right.
- No smart contract, oracle or AI output autonomously releases material project capital or performs a governmental/legal act.
- M5-DPC provides authenticated notice and receipt infrastructure; formal service remains subject to applicable law and fallback methods.
- APN conflict is flagged: working project materials reference APN 5161-005-902; a later external draft referenced APN 5149-010-900. Final identifier remains UNVERIFIED until authoritative title/survey/assessor evidence reconciles it.
- SEC Release 34-106246 / File S7-2026-30 is treated as a proposed rule, not a final compliance standard.
- DOC-23 requires material capital, entities, authority, conflicts, side economics, jurisdiction lineage, and resulting evidence to be represented in the project transaction graph at the appropriate public/regulator/private disclosure level.
- Lawful funds, SPVs, trusts, holding companies, and intermediaries are treated as graph nodes rather than opacity walls; project rules should follow material ownership/control, funding, contractual, and economic relationships as required by law and risk policy.
- ICSN JNR / ENS-style jurisdiction aliases are technical resolution aids only. A name such as singaporechain.eth or californiachain.unitedstateschain.eth does not establish governmental sponsorship, delegated authority, sovereignty, or control of an official government domain.
- M5Global capital-flow indicators are research/economic-intelligence outputs. Any future regulated exchange, ATS, broker-dealer, transfer-agent, custody, clearing, banking, or settlement function requires the actual legal status and authorized operator applicable to that activity.
- OpenData.org is treated as an open entity-reference / grounding source that can improve public reproducibility; it does not create legal authority or replace authoritative registry, regulator, bank, or executed-instrument records.
- Overture Maps / GERS may provide stable spatial/place identifiers for project sites, operating locations, and related geographic entities; spatial identity does not establish title, beneficial ownership, or transaction permission.
- SOURCE_CHAIN_ACTIVATED is an evidence state, not a marketing label: entity, authority, source-of-funds, jurisdiction-path, and regulatory-routing requirements must reach the applicable verified state before the source-chain path is exposed as active.

Document Register

ID	Document	Status	Purpose
DOC-01	Master Deal Term Sheet	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-02	Conditional Capital Commitment Letter	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-03	Public Grantee MOU	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-04	Master Lease Term Sheet	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-05	Investor Executive Brief	Updated to v0.6	Photo-based Investor Executive Brief updated for productive infrastructure, M5 account/transaction OS, SEC alignment, transparent capital provenance, jurisdictional capital lineage, and

			M5Global research intelligence.
DOC-06	Capital Escrow and Draw Agreement	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-07	Rehabilitation and Development Agreement	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-08	Historic Tax Credit Investor Term Sheet	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-09	NMTC / CDE Transaction Term Sheet	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-10	TitleChain Evidence and Digital Records Schedule	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-11	Private Offering / PPM Framework	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-12	Subscription Agreement and Investor Questionnaire	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-13	Philanthropic Grant and PRI Agreement	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-14	Worker and Cooperative Participation Agreement	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-15	Master Risk Factors and Disclosure Schedule	Updated to v0.2	Existing draft revised for M5Canon authority hierarchy and clean-document controls.
DOC-16	M5Canon Master Ricardian and Machine Policy Standard	New in v0.2	Canonical M5Canon / TitleChain supporting standard or schedule.
DOC-17	M5Canon Authority, Jurisdiction and Source-of-Truth Matrix	New in v0.2	Canonical M5Canon / TitleChain supporting standard or schedule.
DOC-18	TitleChain CER, UCC Article 12 and Article 9 Rights Schedule	New in v0.2	Canonical M5Canon / TitleChain supporting standard or schedule.
DOC-19	PPT Federated Registry and Child Collective Governance Agreement	New in v0.2	Canonical M5Canon / TitleChain supporting standard or schedule.
DOC-20	M5-CV W3C Credential, Privacy and Zero-Knowledge Requirements Manifest	New in v0.2	Canonical M5Canon / TitleChain supporting standard or schedule.
DOC-21	M5Canon Project Benchmark and Performance Methodology	New in v0.2	Canonical M5Canon / TitleChain supporting standard or schedule.
DOC-22	M5Canon State-to-Entity Due Process Channel Standard	New in v0.2	Canonical M5Canon / TitleChain supporting standard or schedule.

DOC-23	Source of Funds, Entity Provenance, Jurisdiction Chain & Public Transaction Graph Standard	Updated to v0.6	Defines public/regulator/private disclosure planes, entity resolution, source-of-funds lineage, JNR jurisdiction path, no-undisclosed-material-terms controls, related-party transparency, regulator-ready evidence, and M5Global capital-flow research outputs.

Footer / IP Reference

Every document carries a common footer referencing the TitleChain patent family and public-commons work, while stating that official deeds, agency records and executed instruments control over digital state. The footer does not convert public standards publication into a patent or implementation license beyond the applicable repository/license terms.

Selected Legal / Standards References

- U.S. Patent 12,518,273 (continuation of U.S. Patent 11,720,888), assigned to TitleChain — Decentralized title transfer and validation of assets.
- National Park Service Historic Surplus Property Program — eligible government recipients; private/nonprofit long-term leases may be used with approval.
- California Secretary of State — Form UA-100 for statements by unincorporated associations; Form LP-1 is a limited-partnership certificate.
- California Secretary of State — UCC-1 financing statements perfect security interests in collateral.
- California Commercial Code Division 12 — Controllable Electronic Records.
- W3C Verifiable Credentials Data Model v2.0 — Recommendation (May 15, 2025).
- SEC Release 34-106246 / File S7-2026-30 — proposed Transfer Agent Rules; comments due November 3, 2026.
- BrightQuery — reference entity-intelligence/KYB connector candidate; official-source/entity graph input only, not a source of legal authority.
- OpenCorporates — legal-entity data/provenance reference; official registry and authoritative legal records remain controlling.
- OpenData.org — open global entity reference graph; reported September 2026 coverage includes 324M organizations, 1.2B people, 512M places, and 222 countries; BrightQuery identified as initiating member and seed-data provider. Counts are dated provider metadata, not conformance requirements.
- Overture Maps Foundation / GERS — open geospatial reference and stable place/entity identifiers; BrightQuery joined as a General Member in February 2026 and contributes entity/location data to Overture Places.
- ICSN Jurisdiction Naming & Resolution Registry (JNR) — canonical jurisdiction/resolution layer; ENS aliases are external technical adapters, not sovereign authority.
