312 Spring Commons

WORKER / COOPERATIVE PARTICIPATION AGREEMENT

Draft framework for worker-steward participation, credentials, compensation, patronage and commons governance
without fractional land ownership

v0.2 • September 17, 2026

WORKING DRAFT / COUNSEL REVIEW / PROGRAMMED ASSUMPTIONS

This document is a working draft for discussion, diligence and counsel review. It does not constitute a final offering, binding subscription, legal opinion, tax opinion, governmental approval, guarantee of financing, guarantee of tax benefits, guarantee of title transfer, or guarantee of project performance. Programmed benchmarks are design objectives to be measured project by project, not achieved results or forecasts.

Document code: DOC-14

1. Purpose and Scope

This draft establishes a framework for people who contribute labor, professional services, construction, operations, training, programming or other approved work to participate in the economic and governance structure of 312 Spring Commons. It is not a substitute for an employment agreement, collective-bargaining agreement, construction contract, independent-contractor agreement or cooperative bylaws where those documents are required.

CORE PRINCIPLE

Workers may earn wages, contractual compensation, verified contribution credentials and, if legally established, cooperative membership/patronage or operating-enterprise participation. Workers do not receive fractional ownership of the public fee title merely by working on the project.

2. Participant Information

Field	Participant entry
Legal name	_____
Role / trade / profession	_____
Employer / contractor / co-op	_____
Credential / license ID	_____
M5-CV / verified credential reference	_____
Participation start date	_____
Applicable work agreement	Employment / contractor / union / co-op / other: _____

3. Participation Categories

Category	Examples	Economic treatment
Development / professional	Architects, engineers, project managers, preservation professionals.	Fees/wages under separate contracts; possible co-op participation if established.
Construction / trades	Builders, electricians, plumbers, restoration trades, labor.	Wages/contract payments; prevailing-wage/union rules as applicable; participation only if separately authorized.
Operations	Facilities, food, events, security, technical, studio and community operations.	Wages/contract payments plus possible co-op patronage.
Programs / educators	Teachers, trainers, public-service and cultural program staff.	Compensation/grants/contract payments plus possible participation.
Community steward	Approved governance or volunteer/service contribution.	Non-transferable participation/credential rights; no implied wage or security.

4. Compensation and Labor Compliance

- All legally required wages, overtime, payroll tax, workers' compensation, benefits, prevailing-wage obligations, union/collective-bargaining obligations and contractor rules are governed by applicable law and the actual employment/contract documents.
- A token, credential, patronage expectation or future participation right may not be used to replace wages legally due.
- Volunteer or donated services require separate legal review where wage-and-hour rules could apply.

5. Verified Contribution Record

Approved contributions may be logged against the project record using verifiable credentials and evidence. The record may include role, hours/units, milestone, supervisor/certifier, contract reference, payment status and credential state. It should not publicly expose private payroll, home address, tax information or other sensitive PII.

Contribution field	Example
Project / asset	PPT-EZ-CA-0001 / 312 Spring Commons
Role	Historic restoration electrician
Credential	Active license / training credential reference
Contribution	Approved hours / milestone / deliverable
Certifier	Authorized foreperson / architect / project manager
Compensation status	Paid / approved / disputed / non-compensated public-service contribution
Participation credit	If permitted by co-op rules: patronage/contribution units — separate from land title

6. Cooperative Membership / Patronage — If Formed

- Membership eligibility, admission, voting, patronage formula, capital accounts and distributions are governed by the final cooperative documents and applicable tax/labor law.
- Patronage should be tied to lawful cooperative activity and not marketed as appreciation in the public land.
- No promise is made that every worker will become a member or receive patronage.
- Tax treatment to members is separate from wage treatment and requires accounting/tax counsel.

7. Governance Rights

If a worker cooperative or steward council is formed, the final governance documents may provide defined votes on operations, program priorities, safety, workforce development, local procurement or other matters delegated by the operator. Such votes cannot override the Public Grantee, federal deed, NPS, permitting authority, financing documents or legally authorized project decisionmakers.

8. No Fee-Title Ownership / No Unapproved Security

Participant acknowledges that contribution records, M5-CV credentials, patronage units, governance credentials or project tokens do not constitute the deed, fee title, a mortgage, a lien or a security unless final legal documents expressly create such a right. Any transferable investment interest must be separately offered and documented under applicable securities law.

9. Health, Safety, Licensing and Conduct

- maintain required licenses/certifications;
- comply with safety plans and site rules;
- follow historic-preservation and environmental requirements;
- protect confidential/security-sensitive information;
- report hazards, conflicts and suspected fraud;
- comply with anti-harassment/non-discrimination policies and applicable labor rules.

10. Intellectual Property and Work Product

Ownership/licensing of designs, software, training materials, inventions, media and other work product must be governed by the applicable employment/contract/co-op documents. Participation in the commons does not by itself transfer a worker's pre-existing intellectual property or grant rights in TitleChain/M5 patents or proprietary systems.

11. Privacy / M5-CV

- Use minimum necessary identity/credential data for verification.
- Public displays should show credential status or proof where possible, not underlying sensitive identity documents.
- Worker may request correction of inaccurate contribution records through the defined reconciliation process.
- Official payroll/employment/contract records control over inconsistent digital displays.

12. Disputes and Corrections

Disputed hours, payment, credential status, patronage or governance eligibility must route to an identified human review process. TitleChain may preserve evidence and state history but is not the adjudicator of labor or contract disputes.

13. Termination / Separation

Employment/contract termination is governed by the applicable underlying agreement and law. Cooperative membership or governance rights may have separate termination/withdrawal rules. Earned wages remain governed by law; unvested or contingent participation rights, if any, follow the final cooperative/operating documents.

14. Portfolio Benchmark Participation

De-identified contribution and workflow data may be used to measure coordination hours, repeated reviews, transaction latency, project labor pathways and other programmed benchmarks, subject to privacy, labor and contractual restrictions. Benchmarking is intended to improve future PPT projects and does not score individual workers for investment purposes.

Programmed Benchmark Objectives

These are baseline assumptions deliberately programmed as project performance goals. They are intended to be measured transaction by transaction, compared against actual outcomes and updated as the PPT portfolio grows. They are not historical results, guaranteed savings or investor-return projections.

Metric	Working baseline	Programmed target	Measurement
End-to-end transaction timeline	12-month legacy comparison	2-month target where legally/process-feasible	Days from defined start gate to defined closing/activation gate
Human coordination labor	14,000-hour working baseline	3,000-hour target	Time logs by role and workstream
Administrative labor cost	\$2.10M baseline	\$0.45M target	Actual invoices/payroll attributable to transaction coordination
Escrow & title friction	\$1.1475M baseline	\$0.459M target	Actual third-party fees; legally required services remain
Compliance/audit friction	\$0.45M baseline	\$0.15M target	Actual audit/compliance coordination cost
Holding/time-drag cost	\$8.25M baseline	\$1.375M target	Measured carrying cost over actual elapsed period
Total modeled friction	\$11.9475M baseline	\$2.434M target	Actual verified transaction overhead
Potential modeled reduction	\$9.5135M target delta	Target only	Difference only after comparable categories are verified
Cost of money	TBD comparable project rate	Lower all-in effective cost where risk/structure allow	Spread, fees, reserves, effective annualized cost
Third-party duplication	TBD baseline mapping	Minimize duplicated systems/context transfer	Vendor count, connectors, model calls, reconciliations

16. Participant Acknowledgment

Participant	Project / co-op representative
Name: _____	Name: _____
Signature: _____	Signature: _____
Date: _____	Date: _____

Selected Source Basis and Diligence Notes

- 312 N. Spring Street Acquisition Feasibility Brief, September 16, 2026: project status, accelerated-disposition context, public-grantee structure, diligence list, occupancy and ~\$153M capital-maintenance reference.
- National Park Service Historic Surplus Property Program materials: qualifying governmental recipients, preservation/use obligations and potential long-term private/nonprofit operating leases subject to approval.
- IRS rehabilitation-credit guidance: federal rehabilitation credit based on qualified rehabilitation expenditures; investor/lease/partnership economics require tax counsel and final facts.
- CDFI Fund New Markets Tax Credit Program materials: CDE/QEI/QALICB structure and 39% investor credit over seven years; tract/project/CDE allocation eligibility remains TBD.
- U.S. Patent Nos. 11,720,888 and 12,518,273, "Decentralized title transfer and validation of assets": source basis for the project's proposed TitleChain/M5 title-state methods; claim applicability and implementation remain subject to patent/transaction counsel.
- PPT-EZ-CA-0001 draft documents 01-10, September 17, 2026: master term sheet, conditional commitment, public-grantee MOU, lease term sheet, investor brief, escrow/draw, development, HTC, NMTC and TitleChain evidence schedule.
- Final worker/cooperative structure must be reviewed for wage/hour, prevailing-wage, union, employee-vs-contractor, cooperative, tax, ERISA/benefit and securities implications as applicable.

M5Canon v0.2 Updates

Protocol Status Versus Legal Entity Rights

- PPT/TitleChain REGISTERED, SUSPENDED or REVOKED status is a protocol credential/status. It does not by itself dissolve a cooperative or UNA, terminate employment, cancel vested contract rights, confiscate property or remove statutory rights.
- Any protocol suspension/revocation affecting a participant or child collective must follow documented notice, reason code, cure/appeal procedure and authority rules.

M5Canon v0.2 Conformance and Authority Hierarchy

This document is governed by the M5Canon authority hierarchy for PPT-EZ-CA-0001. An authoritative legal act, executed instrument, government record or legally authorized person or institution establishes the legal right or status. A Ricardian contract expresses the authorized right in human-readable and machine-readable form. Deterministic code may validate, constrain, route and enforce only authority already granted. Jev, language models and other probabilistic systems may classify, score, explain and route, but they do not create legal authority. TitleChain records provenance, state, restrictions, authority and receipts. If digital state conflicts with authoritative legal evidence, execution must halt and route to reconciliation and authorized human review.

Clean Document-Control Status

Document control: human-controlled project draft assembled from project source material and reviewed under M5Canon document-control rules. No embedded generative media, comments, tracked changes, hidden prompts, content-control tags or authoring metadata are intended to be present.
