

PEOPLE'S PUBLIC TRUST ECONOMIC ZONE 0001 — CALIFORNIA

PPT-EZ-CA-0001

M5CANON AUTHORITY, JURISDICTION AND SOURCE-OF-TRUTH MATRIX

Authority-domain map for title, restrictions, contracts, capital, notices, credentials and public records

v0.2 • September 17, 2026 • DOC-17

Human-controlled clean draft • counsel / institutional review as applicable

1. Purpose

This matrix identifies which party or record is authoritative for each material state in PPT-EZ-CA-0001. M5Canon rejects assertions outside an issuer's authority domain and routes conflicts to reconciliation.

State / Domain	Authoritative Source	Authorized Issuer	M5Canon Treatment
Federal fee title before conveyance	United States / authoritative federal title records	GSA / federal disposer as applicable	TitleChain mirrors verified state; cannot change title.
Historic Surplus eligibility / preservation conditions	NPS / GSA program records and final deed	NPS / GSA	Jev may check completeness; M5Canon blocks until official approval exists.
Public grantee authority	Government charter, resolution, delegated authority, counsel-confirmed signatory record	Qualifying public entity	M5-CV verifies authority credential; human/public-body act controls.
Recorded fee-title transfer	Executed conveyance/deed + applicable public recording	Authorized federal/public signatories; recorder where applicable	M5 title-state updates only after required authoritative threshold.
Leasehold / operating rights	Executed master lease and amendments	Public owner + operator + required NPS/public approvals	CER may evidence defined rights; does not expand them.
Building permits / occupancy	Official local permitting/inspection records	Applicable LA/public agencies	M5-DPC may carry signed status events.
Environmental status	Agency orders + qualified professional reports/certifications	Applicable environmental agency/professional	Sensors/oracles are evidence inputs only.
Entity legal status / standing	Secretary of State or other official registry	Relevant state agency	Wallet/VC mirrors signed status; namespace does not form entity.
UCC security interest	Executed security agreement + valid perfection/priority steps	Debtor/secured party + filing office	UCC-1 only where real secured transaction exists.
CER control	Qualifying electronic record + statutory control facts + governing agreement	Controller under applicable UCC law	Separate from underlying land/lease right.
Securities register	Issuer books / registered transfer agent as applicable	Issuer / transfer agent	Separate securities rail; no land-title effect.
Capital draw	Definitive escrow/draw documents + certifications + approvals	Escrow bank/fiduciary/authorized approvers	Code may determine readiness; humans/institution settle.
Worker/co-op membership	Applicable entity governing	Co-op/association	Protocol status does not

TitleChain / M5Canon | U.S. Patent Nos. 11,720,888 & 12,518,273 | Public Commons: TitleChain Foundation / ICSN | github.com/TitleChain-Foundation | titlechainfoundation.org

	documents and records		dissolve legal membership.
Agency notice / compliance message	Signed agency message + applicable statutory/legal effect	Authorized agency	M5-DPC records lifecycle; service sufficiency follows law.

2. Jurisdiction Rules

- Property law and recording follow the jurisdiction of the real property and applicable federal conveyance law.
- Entity law follows the actual formation/registration facts and governing documents; an ENS/domain label is not a choice-of-law clause by itself.
- Contractual governing-law clauses are subject to applicable conflict-of-law and nonwaivable law.
- Federal tax-credit, securities and program rules remain federal even when project entities are formed under state law.
- M5Canon records jurisdiction as metadata plus authority evidence; it does not manufacture jurisdiction through a namespace.

3. Authority Credential Minimum Fields

- issuer identity
- jurisdiction
- authority domain
- authorized action/notice types
- subject/role
- effective date
- expiration/revocation status
- delegation chain if any
- public-key/signature proof
- authoritative source reference

4. Conflict Rule

When two signed assertions conflict, M5Canon compares authority domain and source priority. A lower-priority or out-of-domain assertion cannot override a higher-priority authoritative record. Material conflict sets the transaction state to RECONCILIATION_REQUIRED and blocks dependent execution.
