FIRST EDITION

About this report

An open public research report from TitleChain Foundation - Q3 2026

M5Index - SHADOW CAMEL REPORT

Tracking the real economy behind the headlines.

PUBLIC RESEARCH STANDARD

This first edition is a working public-research release. SHADOW separates verified records from unresolved questions. It is not a title-insurance product, appraisal, legal opinion, investment recommendation, or official bank CAMELS rating. Unknown remains unknown until evidence resolves it.

Initial focus sectors

- Government assets: federal and other public real estate entering disposition, transfer, reuse, or redevelopment.
- Commercial real estate: property, debt, lender, ownership, servicing, maturity, restructuring, foreclosure, and value-migration signals.
- Farmland: title, operator, lease, debt, water, mineral, pipeline/easement, environmental, productivity, and long-term stewardship state.

01

Executive Summary

A first public map of old-world holdings, deal flow, title state, risk, and opportunity

36	25	11	\$570.8M
SEED ASSET RECORDS	CLOSED DISPOSITIONS	ACTIVE / PRE-CLOSE	KNOWN CONSIDERATION

Seed dataset totals reflect the working SHADOW M5Index workbook as of the Q3 2026 research cut. Not every record is yet canonical; 25 records are marked SUBMITTED and 11 SOURCE_VERIFIED.

SHADOW M5Index is a transition-intelligence system. It begins with legacy holdings - public property, commercial real estate, debt, liens, rights, institutional ownership and underused assets - and follows the events that can move them: maturity, extension, modification, disposition, auction, note sale, foreclosure, transfer, acquisition, redevelopment, refinance and resale. The purpose is not to assume where value went. The purpose is to prove it.

THE CENTRAL QUESTION

What is moving out of the legacy economy, who is positioned to acquire it, what state is the title actually in, what obligations travel with it, and where does the ownership and economic value go next?

- Federal disposition data often identifies the asset and transaction stage before it resolves the ultimate buyer, sponsor, lender, and capital source.
- Commercial real-estate stress is uneven: aggregate banking conditions remain resilient, while office and maturity-driven CMBS stress are materially higher than systemwide averages.
- A deed does not equal an unencumbered asset. Rights, liens, easements, environmental obligations, successor liabilities, and transfer restrictions must be represented as state.
- Public/nonprofit buyers and community-oriented acquisition attempts are present alongside private capital. SHADOW is designed to measure the actual proportions rather than assume them.
- The public value question is not only who finances an acquisition, but who retains the productive asset and residual economics after financing obligations are satisfied.

02

What SHADOW M5Index Measures

Systemic Holdings, Assets, Debt & Ownership Watch

Code	Word	Common meaning
S	Systemic	What else is this asset connected to?
H	Holdings	What does this person or entity actually hold or control?
A	Assets	What is the thing of legal or economic value?
D	Debt	Who is owed money, how much, and when does it become a pressure point?
O	Ownership	Who legally owns, economically controls, and ultimately benefits?
W	Watch	What is changing now?

The SHADOW deal-flow feed

- GSA/public disposition notices and auctions
- County deeds, mortgages, assignments, releases and foreclosure records
- Bank Call Reports and public financial filings
- CRE maturity and CMBS servicing events
- Note sales, restructurings and receivership/foreclosure events
- Public-benefit conveyances and People's Trust nominations
- Development entitlements, acquisition financing and subsequent refinancings

**ASSET → OWNER → DEBT → LENDER → CAPITAL → RIGHTS → JURISDICTION → THREAT →
TRANSFER → VALUE**

03

Q3 2026 Market Lens

Strong aggregate bank capital; concentrated CRE and maturity pressure

>99% BANKS WELL CAPITALIZED*	\$325.1B Q1 UNREALIZED SECURITIES LOSSES	12.00% AUG OFFICE CMBS DELINQUENCY	16.90% AUG OFFICE SPECIAL SERVICING
---	---	---	--

**Federal Reserve: over 99% of banks were well capitalized at year-end 2025; aggregate CET1 ratios were about 13% for large and small banks. FDIC Q1 2026 unrealized securities losses were \$325.1B. Trepp August 2026 office CMBS delinquency was 12.00% and office special servicing 16.90%.*

The system-level picture is not the same as the property-level picture.

The Federal Reserve's June 2026 supervision report described bank capital as strong and continued to focus on institutions concentrated in commercial real estate, especially office and multifamily. The 2026 stress test projected more than \$708 billion of losses under a severe hypothetical recession while aggregate capital still remained above minimum requirements. At the same time, Trepp's August data show materially higher stress inside securitized commercial real estate, particularly office. SHADOW treats that divergence as a reason to go bank-by-bank, loan-by-loan, and asset-by-asset rather than infer a systemwide crisis from one indicator.

Preliminary SHADOW CAMEL - public-data system read

PRELIMINARY SCORE: 1.8 / 5 - BAND 2 (STABLE / WATCH)

This is an experimental open-data index, not a confidential regulatory CAMELS rating. M* and S* are explicitly public proxies/inferences. The composite uses C 20%, A 25%, M* 10%, E 15%, L 15%, S* 15%. Confidence: B / methodology v0.1.

- C - Capital: 1. Strong aggregate capitalization and stress-test resilience.
- A - Asset Quality: 2. Broadly stable, with concentrated CRE/office and consumer pockets.
- M* - Management proxy: 2. Lowest-confidence component because internal governance/exam findings are not public.
- E - Earnings: 1. FDIC-insured institutions reported \$80.5B of Q1 2026 net income and 1.26% ROA.
- L - Liquidity: 2. Broadly stable in aggregate; institution-level funding mix remains important.
- S* - Sensitivity: 3. Unrealized securities losses and property/refinancing repricing remain material public signals.

04

M5 Economics Cheat Sheet

M5 IS THE SHIFT FROM USER TO ISSUER

The architecture starts with the accountable human or legal principal - identity, authority, jurisdiction, records, assets and delegated capability - rather than treating the person as merely a user inside someone else's platform.

Canonical identity and authority chain

M5IAM → TCID / M5HUM → private M5POD → M5-CV / SOPHIA → M5Canon → bounded M5AGT

Authority	Meaning	Asset class	Meaning
M1 Bank of Me	Individual human/self; creator, owner, worker, sole proprietor, personal principal	M1	Utility / network / payment-like value
M2 Bank of Us	Cooperative, collective, community, association, DAO, union, member-governed structure	M2	Commodities
M3 Bank of Business	Company, venture, employer, vendor, partnership, commercial organization	M3	Titled one-of-a-kind / unique real-world assets
M4 Bank of Institution	Regulated institution, agency, university, bank, nonprofit, fiduciary, institutional authority	M4	Securities / financial instruments
M5 Bank of Governance / Government	Tribal, local, state, national, treaty, intergovernmental or governmental authority	M5	Sovereign / interbank

M1-M5 asset classes are internal M5/USC classifications and do not replace statutory, regulatory, tax, accounting, securities, commodity, title, or other legal classifications.

SR1-SR5 sovereign-right constraints

- SR1 - Sovereign Identity
- SR2 - Data Sovereignty
- SR3 - Financial Privacy
- SR4 - Self-Determination
- SR5 - Portability

Core M5 terms

M5HUM - Credentialed human principal and root of delegated authority.

M5AGT - Bounded software/AI agent; never receives more authority than the accountable principal.

M5POD - Member-controlled private evidence container.

M5-CV - Member-controlled roles, qualifications, credentials, capability and current-status record.

M5Canon - Deterministic ontology/state machine evaluating authority, policy, consent, jurisdiction, restrictions, lifecycle, revocation and approvals.

M5MST - Origination, Minting, Sovereign Registration, Transfer Authority - the M5 lifecycle/state layer.

M5 Global Index and Exchange - Public economic-intelligence/index layer for provenance-aware data, methodologies and signals; “Exchange” does not mean a securities exchange or ATS.

05

TitleChain Asset State

A verified deed is not the same thing as an unencumbered asset

STATE BEFORE SCORING

Before SHADOW scores an asset - and before a People’s Trust review or transfer - TitleChain must establish what is actually true about the titled asset right now, according to what authority, verified by whom, when, and subject to which rights, claims, obligations, restrictions, liabilities and unresolved conditions.

State element	What SHADOW / TitleChain must know
Asset identity	Parcel / legal description / deed or controlling record / jurisdiction / improvements
Provenance	Origination and chained title/right events
Title verification	Authoritative source, verifier, credential, method, time, freshness, limitations
Rights	Surface, subsurface, mineral, oil/gas, water, air, development, timber, access, leasehold, utility, pipeline, beneficial interests
Encumbrances	Mortgage, deed of trust, liens, easements, rights-of-way, leases, covenants, options, environmental liens
Claims	Asserted, recorded, disputed, validated, satisfied, released, unresolved
Obligations	Maintenance, tax, remediation, restoration, decommissioning, pipeline abandonment, plugging, preservation, tenant/public-benefit obligations
Environmental state	Known/suspected contamination, hazardous materials, underground infrastructure, remediation orders, responsible party, successor liability

State element	What SHADOW / TitleChain must know
Authority state	Owner, signer, manager, trustee, lender consent, governmental/regulatory/court authority
Transfer state	Restrictions, approvals, lien releases, title cure, eligibility, authorization, pending, recorded

TSI - Title State Integrity

TSI measures how complete, current, verified and transferable the known title-and-rights state is. It does not replace title insurance or a legal opinion. It is the gate that prevents a seemingly inexpensive asset from being treated as “clean” when unresolved easements, pipeline rights, mineral reservations, remediation duties or successor liabilities may dominate the economics.

SHADOW state codes

Code	Family	Meaning
P0-P8	Public transition	Identified → Review → Marketed → Bidding → High bidder → Under contract → Closed → Redevelopment → Refinance/resale
S0-S4	Transaction proof	Listed → Auction completed → Award announced → Closing confirmed → Deed confirmed
00-05	Ownership resolution	Buyer undisclosed → Grantee → Principals → Sponsor → Lender → Ultimate capital resolved
Evidence	Claim state	Submitted → Source verified → Corroborated → Canonical; also Disputed / Unresolved / Rejected / Corrected / Superseded

06

Priority Sectors

Government assets, commercial real estate, and farmland

GOVERNMENT ASSETS

PUBLIC VALUE + ACCOUNTABILITY

Disposition stage, statutory process, title/restrictions, current occupancy, deferred maintenance, public-benefit eligibility, buyer/capital provenance, post-transfer value migration.

COMMERCIAL REAL ESTATE

DEBT + TRANSITION PRESSURE

Borrower/SPE, lender, mortgage/deed of trust, maturity, DSCR/LTV, modifications/extensions, CMBS trust/servicers, foreclosure/REO, new buyer, refinance and final value.

FARMLAND

FOOD + LONG-HORIZON STEWARDSHIP

Title, acreage, operator, lease, debt, soil/productivity, water rights, mineral rights, easements/pipelines, conservation restrictions, environmental obligations, land-use law, succession and productive cash flow.

The Q3 2026 seed dataset is heavily weighted toward federal/public real estate because that is where the first SHADOW tranches were built. Farmland is a stated priority sector for expansion; the current seed file should not be read as a representative national farmland sample.

07

Initial Findings from the Seed Dataset

What the first 36 records show - and what they do not yet prove

16	9	11	17
TRANCHE 1	TRANCHE 2	TRANCHE 3	BUYER UNDISCLOSED / NOT YET SELECTED

The buyer/capital chart includes unresolved and not-yet-selected categories. This is not a market-share estimate. The seed sample is intentionally weighted toward large, researchable or strategically relevant cases.

- The working dataset contains 36 asset records: 16 substantially resolved/known-capital cases, 9 unresolved-buyer/rights cases, and 11 active/pre-transfer cases.
- Known closed consideration in the seed workbook totals approximately \$570.8M. Some public-benefit transfers have no cash consideration in the dataset, and some reported prices are floors rather than exact final values.
- The first Tranche shows both private and public/nonprofit recipients; this is why SHADOW should publish denominators and evidence rather than imply that every public disposition is private capture.
- Tranche 2 demonstrates the public-data gap: sale and price can be known while beneficial ownership, lender, or rights state remain unresolved.
- Tranche 3 moves the work upstream: watch significant assets before closing so communities and researchers can evaluate title state, capital needs and public-benefit alternatives while the transaction is still forming.

Selected active federal disposition pipeline in SHADOW

08

Featured Asset Profiles

Priority cases for the first edition

PPT-EZ-CA-0001 - Spring Street Courthouse

312 N Spring Street, Los Angeles, California | P2 MARKETED / S0 LISTED

FEDERAL LISTING: Courthouse

RENTABLE AREA: 751,791 sf on GSA accelerated-disposition list

GSA TESTIMONY: 35% vacancy; almost \$153M of capital-maintenance liabilities avoided if disposed

BUYER: None announced

WHY IT MATTERS

This is the first reference asset for the proposed People's Public Trust workflow because it can be evaluated before ownership leaves the public sector.

OPEN RESEARCH

Complete TitleChain Asset State: parcel/title, occupancy and court-use obligations, historic restrictions, liens, environmental state, disposition authority, capital need and public-benefit eligibility.

Source: [GSA accelerated disposition / testimony](#)

Fort Worth Federal Center

501 W Felix Street, Fort Worth, Texas | P2 MARKETED / S0 LISTED

TYPE: Office / warehouse / service / other

RENTABLE AREA: 893,565 sf

BUYER: None announced

WHY IT MATTERS

Large multi-use federal campus and a potential second-city People's Trust feasibility screen.

OPEN RESEARCH

TitleChain Asset State, environmental history, parcel configuration, occupancy/relocation, disposition path, redevelopment constraints and public-benefit feasibility.

Source: GSA accelerated disposition

Fritz G. Lanham Federal Building + Parking Garage

819 Taylor Street / 401 Texas Street, Fort Worth, Texas | P1 REVIEW / S0 LISTED

LANHAM RENTABLE AREA: 669,264 sf

GARAGE: 8,340 rentable sf; 490,101 gross sf reported by GSA

GSA ANNOUNCEMENT: Added September 10, 2026; GSA says downtown Fort Worth dispositions will save more than \$348M

WHY IT MATTERS

Together with the Fort Worth Federal Center, this creates a large cluster of federal real-estate transition activity in one city.

OPEN RESEARCH

Determine parcel/title relationships, whether garage and building move separately, air/development rights, occupancy, capital requirements and buyer emergence.

Source: GSA Fort Worth announcement

The Depot at Somerville

Roycefield Road / Somerville-Hillsborough, New Jersey | P5 UNDER CONTRACT / O0 BUYER UNDISCLOSED

REPORTED AREA: 815,469 sf

LAND: ~83.5 acres

USE: Industrial / warehouse campus

BUYER: Prospective buyer not publicly resolved in seed record

WHY IT MATTERS

This is the immediate live ownership-resolution case: the public transition has advanced to under contract while the buyer/capital chain is still unresolved in the working dataset.

OPEN RESEARCH

Resolve buyer SPE, sponsor, ultimate capital, acquisition lender, final consideration, title, environmental obligations and redevelopment strategy.

Source: GSA accelerated disposition

Anthony J. Celebrezze Federal Building

1240 E 9th Street, Cleveland, Ohio | P2 MARKETED / S0 LISTED

RENTABLE AREA: 1,194,675 sf

TYPE: Office

GSA ESTIMATE: More than \$180M in maintenance/redevelopment costs potentially avoided

WHY IT MATTERS

A single building at roughly 1.2 million square feet can support a full adaptive-reuse, title-state and capital-stack analysis on its own.

OPEN RESEARCH

Resolve current occupancy, title restrictions, redevelopment feasibility, environmental state, capital needs and buyer interest.

Source: [GSA Celebrezze announcement](#)

Goodfellow Federal Center

4300 Goodfellow Boulevard, St. Louis, Missouri | P2 MARKETED / S0 LISTED

RENTABLE AREA: 1,392,628 sf

TYPE: Laboratory / specialized federal campus

ENVIRONMENTAL: GSA maintains a dedicated environmental reading room documenting asbestos, PCB and other contamination concerns in parts of the campus

WHY IT MATTERS

Goodfellow demonstrates why a property cannot be scored only on price and square footage. Environmental and decommissioning state may dominate transfer economics.

OPEN RESEARCH

Map buildings/parcels, contamination/remediation, responsible parties, successor liability, utilities, title/rights and specialized reuse constraints before any opportunity score.

Source: [GSA environmental reading room](#)

Federal Center South - disposition portion

4735 E Marginal Way S, Seattle, Washington | P2 MARKETED / S0 LISTED

GSA SCOPE: 1201 Building, BIA Building and slab only - not the entire complex

RENTABLE AREA: 422,195 sf

WHY IT MATTERS

The partial-complex structure makes exact asset identity and parcel/building boundary resolution especially important.

OPEN RESEARCH

Resolve exact parcels/buildings, waterfront/industrial environmental state, easements, infrastructure, title and disposition structure.

Source: [GSA accelerated disposition](#)

Montpelier Federal Building

87 State Street, Montpelier, Vermont | Auction completed; community high bid later rejected / no transfer

BUILDING: ~70,000 sf on ~1.6 acres per GSA auction release

COMMUNITY BIDDER: 87 State Street Local Development Corporation in working research

STATE: No completed transfer in seed dataset

WHY IT MATTERS

Montpelier is the counterexample that keeps SHADOW neutral: a community/public-benefit structure can participate in the process, yet winning an auction is not the same as acquiring the asset.

OPEN RESEARCH

Track next federal disposition step, authoritative environmental/remediation obligations, valuation, community capital and any future buyer.

Source: [GSA Montpelier auction release](#)

Former Navy & Marine Corps Reserve Center

1863 Monroe Ave NW, Grand Rapids, Michigan | P4 HIGH BIDDER / S1 AUCTION COMPLETED

BUILDINGS: Four

AREA: 48,120 gross sf

LAND: ~3.47 acres

GSA SAVINGS CLAIM: ~\$350K annual operating cost and \$27M cost avoidance

WHY IT MATTERS

An operating-company high bidder is analytically different from a private-equity acquisition. SHADOW classifies capital rather than flattening all private buyers into one category.

OPEN RESEARCH

Confirm federal acceptance, closing, deed, acquisition financing and final asset-state obligations.

Source: [GSA Grand Rapids auction release](#)

Hawkinsville Air Force Space Surveillance Station

Hawkinsville, Georgia | P6 CLOSED / O0 BUYER UNDISCLOSED

WORKING CONSIDERATION: \$730K

LAND: ~131.8 acres

RIGHTS FLAGS: Water, mineral, oil/gas rights noted in seed research

WHY IT MATTERS

This is a TitleChain Asset State priority because the economic object may be more than the surface parcel. Rights, reservations and environmental/decommissioning obligations must be resolved independently.

OPEN RESEARCH

Obtain recorded deed/assignment; identify buyer, exact rights conveyed or reserved, leases/operators, abandoned infrastructure, remediation/decommissioning and successor liability.

Big Spring Mineral Acres

Big Spring, Texas | P6 CLOSED / O3 SPONSOR IDENTIFIED

WORKING CONSIDERATION: \$3.90M

INTEREST: ~133.6 net mineral acres

WORKING BUYER: Pransh Minerals LLC

SPONSOR: Pransh Group - working research

WHY IT MATTERS

A rights-only asset illustrates why SHADOW cannot assume the “property” is a building or surface estate. The title object itself may be a severed mineral interest.

OPEN RESEARCH

Capture the recorded conveyance, exact mineral estate, reservations, leases, operator interests, royalties/burdens, transferability and ultimate capital.

Former SSA Office - Racine

4020 Durand Ave, Racine, Wisconsin | P6 CLOSED / S4 DEED CONFIRMED / O1 GRANTEE IDENTIFIED

WORKING CONSIDERATION: \$625,151

RECORDED OWNER IN SEED RESEARCH: RAMA LLC

SUBSEQUENT LISTING: Working research observed an asking price of \$895,000 - asking price is not a market value or completed resale

WHY IT MATTERS

Racine is an early Public Value Migration case: federal sale, LLC ownership, subsequent market positioning and proposed adaptive use can be tracked as separate state events.

OPEN RESEARCH

Resolve RAMA LLC beneficial ownership, acquisition financing, subsequent use approvals, any resale/refinance, and the relationship - if any - among similarly named parties in public records. Do not infer relationships from names alone.

Former USGS / Rockaway Grove

Menlo Park, California | P6 CLOSED / O3 SPONSOR IDENTIFIED

WORKING CONSIDERATION: \$137.0M

WORKING GRANTEE: USGS Menlo Park LLC

WORKING SPONSOR: Presidio Bay Ventures

WHY IT MATTERS

One of the largest priced transactions in the seed sample and useful for measuring buyer competition, redevelopment plans and ultimate capital behind a federal disposition.

OPEN RESEARCH

Capture recorded deed, lender, equity capital, final entitlements and post-disposition valuation before promoting the entire chain to canonical status.

Chet Holifield Federal Building / “Ziggurat”

Laguna Niguel, California | P6 CLOSED / O3 SPONSOR IDENTIFIED

WORKING CONSIDERATION: > \$207M

WORKING GRANTEE: Laguna Ridge Health Care Development LLC

WORKING SPONSOR: Hoag Memorial Hospital Presbyterian / nonprofit

WHY IT MATTERS

This is the clearest large-value nonprofit/institutional counterweight in the seed sample and prevents a simplistic public-to-private-equity narrative.

OPEN RESEARCH

Capture exact final consideration, deed, restrictions, environmental obligations, development plan and any financing structure.

09

People’s Trust Pathway

Research first. State first. Authority before action.

THE QUESTION IS NOT “INVESTORS OR NO INVESTORS.”

Major real-world assets may require outside debt and equity. The structural question is who retains the productive asset and residual economics after defined capital obligations are repaid, and what public-benefit restrictions remain attached to the asset.

Conventional path

PUBLIC / DISTRESSED ASSET → ACQUISITION SPE → EQUITY + DEBT → REDEVELOPMENT → REFINANCE / SALE → PRIVATE RESIDUAL VALUE

People’s Trust research path

ASSET → TITLECHAIN STATE REVIEW → JURISDICTION-SPECIFIC PUBLIC-BENEFIT STRUCTURE → STRUCTURED CAPITAL → REHABILITATION → PRODUCTIVE REVENUE → REPAYMENT → DEFINED RESIDUAL ECONOMICS → ENDURING STEWARDSHIP

Nomination workflow

1. Discovered / nominated
2. Evidence review
3. Title and jurisdiction review
4. Debt and liens
5. Rights, claims and obligations
6. Environmental state
7. Public-benefit eligibility

8. Operating and capital feasibility
9. Community review
10. Advance / hold / decline / need more evidence

Nomination creates no ownership right, security, investment right, membership, financing commitment or acquisition obligation.

10

M5 Global Index and Exchange Feed

From chained asset events to privacy-preserving economic intelligence

SHADOW M5Index is the asset/debt/ownership transition index. M5 Global Index and Exchange is the broader public economic-intelligence layer. “Exchange” refers to the exchange of index data, methodologies, signals and market/agency intelligence - not a securities exchange, ATS or broker-dealer venue.

**REAL-WORLD ASSET → TITLECHAIN STATE EVENT → M5CANON / ORBITALYS → SHADOW M5INDEX →
PUBLIC-SAFE AGGREGATE SIGNAL → M5 GLOBAL INDEX AND EXCHANGE**

- TITLE_VERIFIED
- LIEN_ADDED / LIEN_RELEASED
- RIGHT_RESERVED
- DEBT_REFINANCED
- ENVIRONMENTAL_OBLIGATION_IDENTIFIED
- TRANSFER_AUTHORIZED / TRANSFER_RECORDED
- REMEDIATION_COMPLETE
- ASSET_RETURNED_TO_PRODUCTIVE_USE

WHY THIS MATTERS

Economic intelligence can be grounded in actual asset-state changes while private M5POD evidence remains private. The public layer should see provenance-aware signals and aggregates, not private title files, credentials or secrets.

11

Methodology, Evidence, and Contribution Rules

Open research that preserves uncertainty instead of hiding it

- Evidence before inference: verify a record when it can be verified.
- State before scoring: do not score an asset until the known state is represented.
- Provenance before automation: every consequential state needs evidence lineage.

- Authority before action: no score, model, agent or threat vector creates legal authority.
- Unknown means unknown: do not fill gaps with model confidence.
- Events, not overwrites: preserve historical states, corrections and superseded claims.
- Rights are separable: surface ownership does not imply control of every right.
- Obligations travel too: remediation, decommissioning, liens and successor liability must travel with the opportunity analysis.
- Public/private separation: private M5POD evidence stays outside the public Commons.

Evidence states

SUBMITTED → SOURCE_VERIFIED → CORROBORATED → CANONICAL | DISPUTED / UNRESOLVED / REJECTED / CORRECTED / SUPERSEDED

Build the public knowledge commons

- Inspect it.
- Challenge it.
- Add evidence.
- Resolve an owner.
- Trace a lender.
- Follow a deed.
- Map a threat.
- Correct the record.
- Download the data.
- Build from it.
- Nominate an asset.

APPENDIX A

All Featured Properties

Seed dataset - 36 working records

ID	Property	City	ST	P-State	O-State	Price	Buyer / Grantee	Type	Priority	Evidence	Open research
SHD-001	Former USGS / Rockaway Grove	Menlo Park	CA	P6 CLOSED	O3 SPONSOR_IDENTIFIED	\$137.00M	USGS Menlo Park LLC	DEVELOPER	HIGH	SUBMITTED	Capture recorded deed, acquisition lender, ultimate capital source

Dataset basis

The property appendix is generated from SHADOW_M5Index_Master_Dataset_v0.1.xlsx. The workbook distinguishes SUBMITTED from SOURCE_VERIFIED evidence and deliberately leaves unresolved buyer, lender, title, rights and environmental fields open for public contribution and later canonicalization.
