TITLECHAIN EVIDENCE & DIGITAL RECORDS SCHEDULE

Draft exhibit defining authoritative records, M5 title-state representation, evidence classes, authority proofs, state transitions, privacy and audit controls

v0.2 • September 17, 2026

WORKING DRAFT / COUNSEL REVIEW / PROGRAMMED ASSUMPTIONS

This document is a working project draft for discussion, diligence and counsel review. It does not create a binding investment, lease, escrow, tax-credit, development or public-conveyance obligation unless and until definitive agreements are approved and executed by authorized parties. Programmed benchmarks and transaction-efficiency goals are design targets to be measured, not achieved results, forecasts, guarantees, or representations of savings or return.

Document code: DOC-10

1. Purpose

This schedule is intended to be attached to the project's term sheet, public-grantee MOU, master lease, escrow/draw agreement, rehabilitation agreement and later closing documents. It defines how PPT-EZ-CA-0001 intends to use the TitleChain/M5 protocol as a parallel evidence, provenance, authority and transaction-state layer without displacing legally authoritative deeds, public records, bank records, tax records or signed agreements.

The implementation is designed around TitleChain's patented asset-provenance and title-transfer methods, including asset-identifying information, ownership history, trusted third-party evidence and recorded transactions. Patent claim coverage for any specific implementation is a legal matter reserved to patent counsel.

2. Record Hierarchy

Record class	Authoritative source	TitleChain treatment
Fee title / deed	Executed deed + applicable federal/county public record	References and reconciles official instrument; does not replace it.
Public ownership / grantee authority	Public resolutions, statutes, delegations, executed instruments	Stores authority evidence and current state.
Federal/NPS restrictions	Federal deed, NPS approvals, preservation/use plan	Machine-readable restrictions plus linked authoritative evidence.
Lease / operating rights	Executed master lease and amendments	Records rights, term, conditions and version state.
Capital / escrow	Bank/escrow statements and executed finance documents	Records deposit/draw events and evidence references; bank ledger controls funds.
Tax credits	IRS/NPS/CDE/CDFI/tax-accounting records	Records milestone/evidence state; official tax/program records control.
Construction	Executed contracts, stamped plans, certifications, permits	Records milestone/change state and professional attestations.
Identity / authority	M5-CV + authoritative credential/appointment sources	Stores verification status and minimum necessary evidence; sensitive details may remain private.

3. M5 Digital Title-State Representation

The project intends to create a non-fractional digital title-state representation for the anchor asset. It is an evidence/state object that reflects the current reconciled legal/public-record status. It is not the deed itself, not a bearer instrument, not a fractional ownership token, and not a substitute for county/federal land records.

Field	Example / rule
Project ID	PPT-EZ-CA-0001 / TC-PPT-CA-0001 (working identifiers).
Asset identity	312 N. Spring Street; parcel/legal description references subject to authoritative confirmation.
Jurisdiction	United States → California → County/City and other applicable jurisdiction references.
Current titleholder	United States of America until a lawful conveyance is executed and

Field	Example / rule
	recorded/reconciled.
Proposed transferee	Qualifying public grantee — TBD; never displayed as current owner before authoritative event.
Deed / instrument reference	Instrument identifier, execution date, recording reference, source link/hash where lawful.
Restriction state	Historic covenants, NPS/public-use restrictions, reversion rights, easements and retained interests.
Operating rights	Long-term lease/concession/management rights and material restrictions.
Finance/security state	Only legally documented leasehold/project-entity security; never imply lien on public fee estate without authority.
Token state	PROPOSED / PENDING / EXECUTED / RECORDED / RECONCILED / SUSPENDED / SUPERSEDED, as applicable.

4. Authority / M5-CV Evidence

Authority element	Required evidence concept
Person identity	Verified identity credential; public display minimized to role/status where possible.
Role	Government official, public grantee representative, operator, counsel, architect, engineer, funder representative, escrow officer, etc.
Legal authority	Appointment, delegation, resolution, power, contract authority or professional license as applicable.
Scope	Specific action(s) the person may approve/sign.
Validity period	Effective/expiration/revocation state.
Signature / attestation	Cryptographic signature or authoritative digital-signature reference tied to the underlying legal instrument.
Privacy classification	PUBLIC / LIMITED / PRIVATE / PRIVILEGED.

5. M5MST / Transaction Event Taxonomy

Event	Minimum state evidence
ASSET_REGISTERED	Asset identifier + authoritative source references.
FEDERAL_STATUS_VERIFIED	GSA/HUD/federal source evidence and timestamp.
HISTORIC_STATUS_VERIFIED	National Register/NPS evidence.
PUBLIC_GRANTEE_IDENTIFIED	Entity identity + eligibility evidence; still not title transfer.
AUTHORITY_VERIFIED	Authorized signer/decisionmaker evidence.

Event	Minimum state evidence
DUE_DILIGENCE_OPENED	Scope, responsible parties and source-data manifest.
TITLE_PACKAGE_VERIFIED	Title/survey/legal description/easement review state.
PRESERVATION_PLAN_APPROVED	Required NPS/public-owner approval evidence.
CAPITAL_COMMITMENT_RECORDED	Executed commitment reference and conditions; no representation of funded cash until deposited.
DRAW_RELEASED	Bank/escrow transaction reference + required approvals/certifications.
DEED_EXECUTED	Executed legal instrument; not yet necessarily recorded.
DEED_RECORDED	Official recording/public-record reference.
PUBLIC_TITLE_RECONCILED	TitleChain state updated only after authoritative recording/source reconciliation.
MASTER_LEASE_EXECUTED	Executed lease + NPS/public-owner approval references.
PLACED_IN_SERVICE	Tax/accounting and project evidence as applicable.
PROJECT_CLOSEOUT	Final certifications, cost report, as-builts and ongoing compliance state.

6. Decision and Control Layers

Layer	Permitted role	Not permitted
M5Canon	Deterministic policy checks: required fields, dependency gates, authority validity, version/state conditions.	Cannot invent legal authority or override governing documents.
Jev / System One	Typed probabilistic decisions: classify, score, route, detect anomaly/exception.	Cannot transfer title, approve a draw, sign a deed or replace legal/professional judgment.
LLM / System Two	Research, draft, summarize, explain, compare and support complex analysis.	Generated text is not authoritative approval or factual proof without source validation.
Authorized Human / Institution	Makes legally required decisions and signatures within documented authority.	Cannot bypass applicable law, federal deed/NPS/public-owner restrictions or other governing documents.

7. Public / Private Evidence Partition

Classification	Examples	Treatment
PUBLIC	Public deed references, project status, public resolutions, non-sensitive benchmark data, public restrictions.	May be displayed in public explorer, subject to legal/public-record limits.
LIMITED	Investor/funder status, vendor contracts, detailed cost data, selected reports.	Permissioned access based on role and agreement.

Classification	Examples	Treatment
PRIVATE	PII, bank details, signatures, sensitive engineering/security data, private tax information.	Stored off public chain / private M5POD or approved system; only proof/reference exposed.
PRIVILEGED	Attorney-client material, legal strategy, protected investigations.	Excluded from public ledger and tightly permissioned; metadata minimized.

8. Evidence Receipt Requirements

Every material state transition should generate or reference an evidence receipt containing, at minimum:

- event identifier and timestamp;
- asset/project identifier;
- prior state and new state;
- initiating person/entity and verified authority;
- governing rule/policy version;
- source-document references/hashes;
- required approvals and signatures;
- M5Canon gate results;
- Jev/LLM outputs only if used, with model/version and confidence where available;
- exception/override record;
- public/private classification;
- authoritative external record reference after execution/recording.

9. Reconciliation, Corrections and Supersession

- TitleChain must not silently overwrite a conflicting authoritative record.
- A conflict creates a reconciliation event with source references, responsible reviewer and resolution status.
- Incorrect or superseded digital state remains auditable and is marked SUPERSEDED/CORRECTED rather than erased where legally appropriate.
- Current-title display is updated only after the project's defined authoritative evidence threshold is met.

10. Benchmark Telemetry

The system should capture the operational telemetry needed to test PPT benchmark assumptions across projects, including:

- elapsed time by gate/workstream;
- human labor hours by role;
- number of reviews/handoffs;
- vendors and connectors used;
- LLM/Jev calls, input/output tokens where available, retries and model cost;
- deterministic checks executed;
- exceptions/escalations;
- third-party fees;
- escrow/title/compliance costs;
- holding/carrying costs;
- cost of money and reserve burden;
- recording/reconciliation latency;
- data-quality and correction events.

Programmed Benchmark Objectives

These baseline assumptions are deliberately programmed into the project as performance goals. They are intended to be measured transaction by transaction and updated as the PPT portfolio grows. They are not historical results, guaranteed savings, or investor-return projections.

Metric	Working baseline	Programmed target	Measurement
End-to-end transaction timeline	12-month legacy comparison	2-month target where legally/process-feasible	Days from defined start gate to defined closing/activation gate
Human coordination labor	14,000-hour working baseline	3,000-hour target	Time logs by role and workstream
Administrative labor cost	\$2.10M baseline	\$0.45M target	Actual invoices/payroll attributable to transaction coordination
Escrow & title friction	\$1.1475M baseline	\$0.459M target	Actual third-party fees; no assumption that legally required services disappear
Compliance/audit friction	\$0.45M baseline	\$0.15M target	Actual audit/compliance coordination cost
Holding/time-drag cost	\$8.25M baseline	\$1.375M target	Measured carrying cost over actual elapsed period
Total modeled friction	\$11.9475M baseline	\$2.434M target	Actual verified transaction overhead
Potential modeled reduction	\$9.5135M target delta	Target only	Difference only after actual comparable cost categories are verified
Cost of money	TBD comparable project rate	Lower all-in effective cost where structure and risk reduction permit	Spread, fees, effective annualized cost, reserve burden
Third-party system/agent duplication	TBD baseline mapping	Minimize duplicated systems and repeated context transfer	Vendor count, connectors, model calls, reconciliation events

12. Sample Title-State Receipt

Field	Illustrative value
Event	DEED_RECORDED
Asset	TC-PPT-CA-0001 / 312 N. Spring Street
Prior state	DEED_EXECUTED
New state	DEED_RECORDED / PUBLIC_TITLE_RECONCILIATION_PENDING
Legal titleholder	As stated in recorded deed — source reference required
Instrument	County/federal recording reference — TBD
Authority	Authorized public/federal signatories — credential/reference IDs
Restrictions	Historic/public-use/reversion/easement references
M5Canon	Required-recording-reference gate PASS

Field	Illustrative value
Jev	Not required for legal state transition; may classify exceptions
Public display	Titleholder, jurisdiction, instrument reference, restriction summary, status
Private evidence	Full signed documents, PII, privileged/supporting materials as permitted

13. Amendment and Governance

Changes to this schedule require the same document-governance process used for project legal documents: version number, date, authorized approvers, reason for change, compatibility review and updated machine-readable policy. If the machine-readable rule conflicts with an executed legal instrument, the executed legal instrument controls unless and until formally amended.

14. Acknowledgment / Exhibit Adoption

Party	Name / Title	Signature / Date
Public Grantee / Owner	TBD	_____
Project Operator	TBD	_____
TitleChain / Technology Administrator	TBD	_____

Selected Source Basis and Diligence Notes

- 312 N. Spring Street Acquisition Feasibility Brief, September 16, 2026: project status, public-grantee structure, diligence list, occupancy and \$153M capital-maintenance reference.
- National Park Service, Historic Surplus Property Program: eligible public recipients may acquire qualifying historic surplus property at no cost; private/nonprofit operators may participate through NPS-approved long-term leases.
- IRS Rehabilitation Credit / Form 3468 guidance: federal rehabilitation credit equals 20% of qualified rehabilitation expenditures and is generally allowed ratably over five years; lessee eligibility and lease-term requirements require tax counsel.
- CDFI Fund, New Markets Tax Credit Program: the investor credit totals 39% of the qualified equity investment over seven years through certified CDE structures; project/CDE eligibility remains to be established.
- U.S. Patent Nos. 11,720,888 and 12,518,273, “Decentralized title transfer and validation of assets”: distributed-ledger methods for recording asset provenance, ownership history, and transactions. Project implementation and patent-claim applicability remain subject to counsel.
- This schedule is intentionally technology-neutral as to the legally authoritative registry: official federal/county/state records control; the M5 title-state representation is a reconciled evidence layer.

M5Canon v0.2 Updates

Expanded Record Classes

- FEE_TITLE_STATE — authoritative deed/titleholder/public-record state.
- FEDERAL_RESTRICTION_STATE — NPS, historic, reversion and public-use restrictions.
- LEASEHOLD_RIGHTS_STATE — rights granted by executed lease/operating instruments.
- CER_CONTROL_STATE — optional control state of a qualifying electronic record associated with defined rights; not a substitute for the underlying deed/lease.

- ARTICLE9_SECURITY_STATE — only if a secured transaction exists and applicable perfection/priority requirements are satisfied.
- SECURITIES_STATE — only if a security is actually issued and regulated records are required.
- NOTICE_STATE / DUE_PROCESS_STATE — signed agency/entity notices, delivery, acknowledgment, action, dispute/cure and resolution.
- M5MST_EVENT_HISTORY — immutable/auditable sequence of state transitions and receipts.

Identifier Conflict Gate

- M5Canon must BLOCK promotion of a title state when authoritative asset identifiers conflict. Current project materials include a working APN 5161-005-902 while a later external draft referenced APN 5149-010-900. This discrepancy is not resolved by software; authoritative title, assessor, survey and recorder evidence must reconcile it before a final asset identifier is published as verified.

M5-DPC Notice State

- Each notice is typed by issuer, jurisdiction, authority domain, legal-effect class, issue time, delivery time, response deadline, acknowledgment state, action state, final resolution and fallback method. Notice states include ISSUED, DELIVERED, ACKNOWLEDGED, ACTIONED, RESOLVED, DISPUTED, CURED, EXPIRED, SUPERSEDED and WITHDRAWN.

M5Canon v0.2 Conformance and Authority Hierarchy

This document is governed by the M5Canon authority hierarchy for PPT-EZ-CA-0001. An authoritative legal act, executed instrument, government record or legally authorized person or institution establishes the legal right or status. A Ricardian contract expresses the authorized right in human-readable and machine-readable form. Deterministic code may validate, constrain, route and enforce only authority already granted. Jev, language models and other probabilistic systems may classify, score, explain and route, but they do not create legal authority. TitleChain records provenance, state, restrictions, authority and receipts. If digital state conflicts with authoritative legal evidence, execution must halt and route to reconciliation and authorized human review.

Clean Document-Control Status

Document control: human-controlled project draft assembled from project source material and reviewed under M5Canon document-control rules. No embedded generative media, comments, tracked changes, hidden prompts, content-control tags or authoring metadata are intended to be present.
