SUBSCRIPTION AGREEMENT + INVESTOR QUESTIONNAIRE

Draft investor onboarding, representations, eligibility, commitment and admission framework

v0.2 • September 17, 2026

WORKING DRAFT / COUNSEL REVIEW / PROGRAMMED ASSUMPTIONS

This document is a working draft for discussion, diligence and counsel review. It does not constitute a final offering, binding subscription, legal opinion, tax opinion, governmental approval, guarantee of financing, guarantee of tax benefits, guarantee of title transfer, or guarantee of project performance. Programmed benchmarks are design objectives to be measured project by project, not achieved results or forecasts.

Document code: DOC-12

1. Subscription Overview

This draft is a modular subscription and investor-questionnaire form for use only after the issuer, security, offering exemption and definitive governing documents are established. Until then, it is a diligence template and does not create a binding sale of securities.

Field	Subscriber input
Legal name	_____
Entity type / jurisdiction	_____
Principal address	_____
Contact person / title	_____
Email / phone	_____
Tax ID / EIN (provided privately)	_____
Subscription amount	\$ _____
Security / class	TBD / _____
Funding source type	Cash / credit facility / other: _____
Beneficial owner(s)	Separate confidential schedule / KYC file

2. Subscription Mechanics

Subject to acceptance by the Issuer and satisfaction of all closing conditions, Subscriber applies to acquire the security described in the final offering documents in the subscription amount set forth above. No subscription is effective until accepted by an authorized Issuer signatory and the applicable funds/closing conditions have been satisfied.

- Issuer may accept or reject a subscription in whole or in part, subject to applicable law and offering documents.
- Funds may be held in escrow or deposited only under approved instructions; no direct transfer to a personal wallet or unauthorized account is permitted.
- Any digital record/token reflects only the rights in the actual subscribed instrument and does not represent the public fee title unless the definitive legal documents expressly provide otherwise.

3. Subscriber Representations

1. Subscriber has received and reviewed the current offering/disclosure documents and risk factors when issued.
2. Subscriber understands that the project remains subject to public-conveyance, title, preservation, rehabilitation, financing, tax and operating risks.
3. Subscriber is acquiring the security for its own account or for a disclosed beneficial owner and not with a present view to an unlawful distribution.
4. Subscriber has authority to execute the subscription and make the investment.
5. Subscriber can bear the economic risk of an illiquid investment, including loss of all invested capital.
6. Subscriber has had the opportunity to consult legal, tax, accounting and investment advisers.
7. Subscriber is not relying on programmed benchmark objectives as guarantees of cost savings, timing, return, tax treatment or liquidity.
8. Subscriber understands that government agencies, NPS, public entities, tax-credit authorities and regulators do not endorse an investment merely by participating in or overseeing a public process.
9. Subscriber understands that TitleChain/M5 records are evidence/provenance tools and do not independently create legal title, public approval or investment rights.

4. Investor Eligibility Questionnaire — Counsel to Finalize

The final questionnaire must be matched to the selected federal/state offering exemption. The following categories are placeholders for counsel review; checking a box does not itself establish eligibility.

Category	Check / provide
Natural person — income test	☐ Meets applicable individual/joint income threshold under final exemption; evidence if required.
Natural person — net worth test	☐ Meets applicable net-worth threshold excluding primary residence as required by law.
Director / executive / knowledgeable person category	☐ Applicable only if counsel determines qualification.
Bank / insurance company / registered investment entity	☐ Entity category and regulatory status: _____.
Corporation / partnership / LLC / trust — assets test	☐ Meets applicable entity asset threshold and not formed solely to acquire the offered security, if required.
Entity owned entirely by qualifying investors	☐ Ownership schedule attached.
Family office / family client	☐ Meets applicable requirements if relied upon.
Other eligible category	☐ Counsel basis: _____.
Non-U.S. investor	☐ Separate securities/tax/sanctions analysis required.

5. Entity Authority and Documentation

- formation documents and certificate of good standing/status as applicable;
- governing agreement/bylaws/trust instrument;
- board/member/manager/trustee authorization if required;
- incumbency or authorized-signatory certificate;
- beneficial-ownership information;
- tax forms (e.g., appropriate W-9/W-8 series);
- banking/funding instructions through approved secure channel.

6. KYC / AML / Sanctions

Subscriber agrees to provide information reasonably requested by the Issuer, placement agent if any, administrator, escrow/depository institution or other regulated party to satisfy identity, beneficial-ownership, sanctions, anti-money-laundering and source-of-funds obligations. Failure to satisfy required checks may result in rejection, delayed closing or mandatory return/withholding of funds as permitted by law.

7. Tax and Regulatory Acknowledgments

- No representation is made that an investor will receive HTC, NMTC or any other tax credit unless the investor is a party to the specific qualified tax-credit structure and the applicable requirements are satisfied.
- Tax treatment may differ by investor, instrument and jurisdiction and may change.
- Subscriber must rely on its own tax advisers.

8. Transfer Restrictions / Illiquidity

The offered security is expected to be restricted and illiquid. Transfers may require issuer consent, legal opinions, investor eligibility, securities-law compliance, tax review, public/project covenant review and updates to the authoritative ownership register. TitleChain may evidence the approved transfer state but cannot authorize an otherwise prohibited transfer.

9. Information, Confidentiality and Digital Records

- Private investor identity, tax information, bank details and signatures should remain in permissioned systems/M5POD or regulated provider systems; public-chain records should contain only necessary proof/reference metadata.
- Subscriber consents to electronic delivery and electronic signatures to the extent permitted in definitive documents.
- Subscriber acknowledges that official legal/financial records control over any inconsistent technology display.

10. Programmed Benchmark Acknowledgment

Subscriber acknowledges that the project tracks programmed targets for transaction time, coordination hours, friction cost, cost of money and system duplication. These are operational goals used for benchmarking and project ranking; they are not investment performance metrics and do not establish a right to any return or remedy if targets are missed.

Programmed Benchmark Objectives

These are baseline assumptions deliberately programmed as project performance goals. They are intended to be measured transaction by transaction, compared against actual outcomes and updated as the PPT portfolio grows. They are not historical results, guaranteed savings or investor-return projections.

Metric	Working baseline	Programmed target	Measurement
End-to-end transaction timeline	12-month legacy comparison	2-month target where legally/process-feasible	Days from defined start gate to defined closing/activation gate
Human coordination labor	14,000-hour working baseline	3,000-hour target	Time logs by role and workstream
Administrative labor cost	\$2.10M baseline	\$0.45M target	Actual invoices/payroll attributable to transaction coordination
Escrow & title friction	\$1.1475M baseline	\$0.459M target	Actual third-party fees; legally required services remain
Compliance/audit friction	\$0.45M baseline	\$0.15M target	Actual audit/compliance coordination cost
Holding/time-drag cost	\$8.25M baseline	\$1.375M target	Measured carrying cost over actual elapsed period
Total modeled friction	\$11.9475M baseline	\$2.434M target	Actual verified transaction overhead
Potential modeled reduction	\$9.5135M target delta	Target only	Difference only after comparable categories are verified
Cost of money	TBD comparable project rate	Lower all-in effective cost where risk/structure allow	Spread, fees, reserves, effective annualized cost
Third-party duplication	TBD baseline mapping	Minimize duplicated systems/context transfer	Vendor count, connectors, model calls, reconciliations

12. Subscriber Certifications

Certification	Initial
Information provided is true and complete to the Subscriber's knowledge.	_____
Subscriber will notify Issuer of material changes before closing.	_____
Subscriber accepts the risk and illiquidity acknowledgments.	_____

Certification	Initial
Subscriber understands no land-title interest is conveyed absent explicit definitive documentation.	_____
Subscriber understands benchmark targets are not guarantees.	_____

13. Signature / Acceptance

Subscriber	Issuer acceptance
Name: _____	Accepted by: _____
Title: _____	Title: _____
Signature: _____	Signature: _____
Date: _____	Date: _____

Selected Source Basis and Diligence Notes

- 312 N. Spring Street Acquisition Feasibility Brief, September 16, 2026: project status, accelerated-disposition context, public-grantee structure, diligence list, occupancy and ~\$153M capital-maintenance reference.
- National Park Service Historic Surplus Property Program materials: qualifying governmental recipients, preservation/use obligations and potential long-term private/nonprofit operating leases subject to approval.
- IRS rehabilitation-credit guidance: federal rehabilitation credit based on qualified rehabilitation expenditures; investor/lease/partnership economics require tax counsel and final facts.
- CDFI Fund New Markets Tax Credit Program materials: CDE/QEI/QALICB structure and 39% investor credit over seven years; tract/project/CDE allocation eligibility remains TBD.
- U.S. Patent Nos. 11,720,888 and 12,518,273, “Decentralized title transfer and validation of assets”: source basis for the project's proposed TitleChain/M5 title-state methods; claim applicability and implementation remain subject to patent/transaction counsel.
- PPT-EZ-CA-0001 draft documents 01-10, September 17, 2026: master term sheet, conditional commitment, public-grantee MOU, lease term sheet, investor brief, escrow/draw, development, HTC, NMTC and TitleChain evidence schedule.
- Accredited-investor and offering-exemption categories are placeholders and must be conformed to the law and exemption in effect at the time of the offering.

M5Canon v0.2 Updates

Investor Digital-State Acknowledgment

- The Investor acknowledges that TitleChain entries, CER control, wallet credentials, namespaces and digital representations do not independently convey fee title, create a security interest, perfect collateral, establish a tax credit or replace the definitive governing documents and official records.
- The Investor consents to receive project communications electronically where permitted, but formal legal service is governed by applicable law and the definitive documents.

M5Canon v0.2 Conformance and Authority Hierarchy

This document is governed by the M5Canon authority hierarchy for PPT-EZ-CA-0001. An authoritative legal act, executed instrument, government record or legally authorized person or institution establishes the legal right or status. A Ricardian contract expresses the authorized right in human-readable and machine-readable form. Deterministic code may validate, constrain, route and enforce only authority already granted. Jev, language models and other probabilistic systems may classify, score, explain and route, but they do not create legal authority. TitleChain records provenance,

state, restrictions, authority and receipts. If digital state conflicts with authoritative legal evidence, execution must halt and route to reconciliation and authorized human review.

Clean Document-Control Status

Document control: human-controlled project draft assembled from project source material and reviewed under M5Canon document-control rules. No embedded generative media, comments, tracked changes, hidden prompts, content-control tags or authoring metadata are intended to be present.
