

PPT FEDERATED REGISTRY AND CHILD COLLECTIVE GOVERNANCE AGREEMENT

Root/child registration, naming, authority boundaries, notice, cure, appeal and protocol-status rules

v0.2 • September 17, 2026 • DOC-19

Human-controlled clean draft • counsel / institutional review as applicable

1. Purpose

This draft establishes the governance relationship between the People's Public Trust / TitleChain public-commons registry and participating child collectives. It is a protocol and contractual governance framework; it does not by itself form a legal entity or substitute for required state filings.

2. Root Registry Functions

- publish M5Canon versions and conformance profiles
- validate permitted namespace/name use
- verify required entity/credential evidence
- maintain child protocol status
- issue signed protocol notices and receipts
- suspend protocol permissions where documented conditions are met
- maintain appeal/cure records
- publish interoperability and public-commons standards

3. Child Collective Requirements

- identify actual legal form, jurisdiction and official registration/filing if any
- maintain current authorized-signatory and notice-endpoint credentials
- accept applicable M5Canon/Ricardian terms
- separate public fee title from operating/community participation rights
- prohibit unapproved representation that protocol status equals government approval
- maintain privacy/data-minimization controls
- preserve member/statutory rights independent of protocol status

4. California Entity Filing Guardrail

For an unincorporated association, the project must use the California Secretary of State forms and statutes actually applicable to that entity type. Form LP-1 is a Certificate of Limited Partnership; it is not a UNA registration form. Current California Secretary of State guidance identifies Form UA-100 as a Statement by Unincorporated Association. Counsel must determine whether and how a particular collective should be formed, registered or noticed.

5. Registration States

Protocol State	Meaning	Legal Effect
PENDING	Evidence incomplete or under review	No implied legal/entity approval.
REGISTERED	Current M5Canon conformance evidence accepted for protocol participation	Internal protocol status only unless a separate agreement gives additional effect.
SUSPENDED	Temporary restriction pending cure/review	Does not dissolve entity or cancel vested rights by itself.
REVOKED	Protocol participation/naming/permissions terminated under this agreement	Does not erase public filings, contracts, property or statutory rights.
EXPIRED	Credential/registration period ended	Re-onboarding may be required.

6. Notice, Cure and Appeal

1. Issue signed notice identifying rule, evidence, authority and proposed action.
2. Provide cure period unless emergency suspension is expressly authorized.
3. Allow authorized response and evidence submission.
4. Record reviewer/decision authority separate from automated detection where material rights are affected.
5. Issue final protocol decision with reasons and effective date.
6. Provide appeal/review path where specified by governing agreement.

7. Namespace / Jurisdiction Rule

ENS or other namespace labels may act as resolvers and jurisdiction metadata. They do not by themselves form entities, confer governmental authority or make a state's law govern. M5Canon requires evidence of the actual legal entity, property location, governing instrument and applicable law.
